## **DETAILED ACTION**

### ***Reasons of Allowance***

1. The following is an examiner's statement of reasons for allowance: claims 1 – 11 and 16 are allowable over the prior art of record for the reasons as stated in the Applicant's amendment filed on November 17, 2005 pages 2 – 7.

In this case, the prior art teaches network and mobile terminal functionality can be observed by tracing, and a tracing facility enables the network to trace the activities of various entities when specific events occur within system, and the tracing facility enables the tracing of all the information that is available to the network concerning the call path as the tracing facility is that activation as well as deactivation of the tracing is done manually at the switching center MSC by the operator.

None of the prior art of record teaches or fairly suggests that a mobile station is in communication with mobile network for trace activation comprises directing a communication from the mobile station to the predefined trace activation number of tracing facility with a receiver for activating tracing for the mobile station, and activating tracing at the tracing facility for mobile station from which the communication originates, and tracing mobile communications system activities relating to the mobile station from which the communication originates when a trace activation event occurs, and then generating a trace report for the mobile station, and together with combination of other element as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
